MONMOUTH COLLEGE 1895

THIRTY-NINTH

ANNUAL CATALOGUE

OF THE

OFFICERS AND STUDENTS

OF

Monmouth College

FOR THE

ACADEMICAL YEAR

ENDING

JUNE 13, 1895.

Monmouth, Illinois
E. J. Clarke, Printer and Binder.

Opened September 3, 1856.
Incorporated February 7, 1857.

CITY DIRECTORY PRESS
112-114 S FIRST ST

Calendar for 1895-96.

Examinations of Candidates for Admission begins 9 a. m., Sept. 2
Fall Term begins at 2 p. m. ..... September 4
Fall Term ends ..... December 19
Winter Term begins at 1 p. m. ..... January 7
Day of Prayer for Colleges ..... January 29
Winter Term ends ..... March 27
Spring Term begins at 1 p. m. ..... April 8
Senior Examinations ..... May 19–23
Final Examinations ..... June 3–7
Baccalaureate Sermon by the President at 3 p. m. ..... June 8
Sermon before the Christian Union at 8 p. m. ..... June 8
Annual Prayermeeting in College Chapel at 8 p. m. ..... June 9
Annual Meeting of the Senate at 10:30 a. m. ..... June 10
Class Night at 8 p. m. ..... June 10
Annual Meeting of the Alumni Association at 9 a. m. ..... June 11
Public Exercises of Alumni Association at 8 p. m. ..... June 11
Commencement Day ..... June 12
Annual Contest at 8 p. m. ..... June 12
June Examinations for Admission 4–7

THE SENATE.

The corporate powers of the MONMOUTH COLLEGE are vested in the Senate, which consists of the following Trustees and Directors convened in joint session; and for certain purposes, in the Trustees convened separately.

The next annual meeting of the Senate will be held in the College, in room No. 2, on Tuesday, June 11, A. D. 1895, at 10:30 o'clock A. M. The presence of FIVE Trustees and NINE Directors is necessary to constitute a quorum.

TRUSTEES.

A. H. DEAN,	JOSEPH STEVENSON,	R. A. WILSON, '91.
GEO. M. EVANS,	W. S. WEIR,	J. R. HANNA, '92.
W. T. CAMPBELL,	W. FIROVED,	E. MACDILL, '93.

DIRECTORS.

The term of office of the following expires January 1, 1896.

Rev. D. C. Stewart.....St. Louis, Mo.
Rev. J. W. Cleland.....Peatone.
Draper Babcock, Esq.....Monmouth.
Rev. J. C. Truesdale.....Stanwood, Iowa.
Rev. J. S. Colvin.....Mission Creek, Neb.
Col. J. D. Palmer.....Washington, Iowa.
Rev. G. I. Gordon.....Dunreith, Ind.
A. W. Brandt, Esq.....Des Moines, Iowa.
Rev. G. W. Hamilton.....Bellefontaine, Ohio.
Rev. A. M. Campbell.....Princeton, Ind.

The term of office of the following expires January 1, 1897.

Rev. J. J. Huston.....Belle Centre, Ohio.
Rev. S. H. Mc Dill.....
E. E. Elliot, Esq.....Morning Sun, Iowa.
Rev. Wm. McKirahan.....Oskaloosa, Iowa.
O. J. Gibson, Esq.....Red Oak, Iowa.

Rev. J. A. Monteith.....Cedar Rapids, Iowa.
Rev. E. S. Martin.....Superior, Neb.
Dr. D. R. Johnston.....Aledo, Ill.
W. P. Pressly, Esq.....Monmouth.

The term of office of the following expires January 1, 1898.

T. H. Gault, Esq.....Chicago, Ill.
Weaver White, Esq.....Paxton, Ill.
Rev. J. A. Renwick.....Biggsville, Ill.
Rev. J. M. Hamilton.....Reinbeck, Iowa.
Rev. W. S. Lorimer.....Clearfield, Iowa.
W. B. Bryson, Esq.....Xenia, Ohio.
Rev. J. A. C. McQuiston.....Cherry Fork, Ohio.
Rev. W. A. Robb, D. D.....Jameston, Ohio.
Rev. J. A. Ferguson.....Loveland, Col.

The following were elected by the Alumni to represent them in the Senate:

Hon. J. H. McCullough, Omaha, Neb., for 3 years from Jan. 1 1893.
Dan. E. Waid, Esq., Chicago, for 3 years from January 1, 1894.
Hon. W. C. Norcross, Monmouth, for 3 years from January 1, 1895.

OFFICERS OF SENATE AND TRUSTEES.

J. B. McMichael.....President.
J. E. Alexander, A. M.....Secretary.
R. A. Wilson, A. M.....Treasurer.

LADIES' ADVISORY BOARD.

Mary A. Sterrett, President.

Mrs. A. C, Harding, Mrs. J. J. Glenn, Mrs. C. Hardin,
Mrs. M. D. Sterrett, Mrs. J. B. McMichael, Mrs. J. H. Reid.
Mrs. Joseph Stevenson.

Faculty and Instructors.

J. B. McMICHAEL, D. D., President
And Alumni Professor of Logic, Philosophy and Biblical Instruction.

JOHN H. McMILLAN, A. M., Vice President
And Professor of Latin and Hebrew.

MARY A. STERRETT, B. S., Lady Principal
And Harding Professor of English Literature.

J. H. WILSON, Ph. D.,
Professor of Greek.

THOS. H. ROGERS, A. M.,
Professor of Mathematics.

RUSSELL GRAHAM, D. D.,
Professor of Social Science.

CLEMENTINE CALVIN, A. M.,
Professor of German and Elocution.

*SAMUEL S. MAXWELL, M. S.,
†W. EDGAR TAYLOR, M. S.,
Professor of Biology.

J. N. SWAN, Ph. D.,
Pressly Professor of Chemistry and Physics.

E. C. ZARTMAN, B. M.,
Professor of Vocal and Instrumental Music

ALICE WINBIGLER, A. M.,
Associate Professor of Mathematics and Astronomy.

THOS. S. McCLENAHAN,
Instructor in Practical Surveying and Engineering.

T. B. GLASS, A. B.,
Instructor in Latin.

*Absent on leave, doing post-graduate work at the University of Chicago.
†In charge of the department in the absence of Prof. Maxwell.

Officers of the Faculty.

J. B. McMICHAEL,
President.

JOHN H. McMILLAN,
Vice President.

T. B. GLASS,
Secretary.

J. H. WILSON,
Treasurer.

JOHN H. McMILLAN,
Registrar.

RUSSELL GRAHAM,
Librarian.

Material Advantages.

The City of Monmouth, in which the College is located, contains about seven thousand inhabitants, and is situated at the junction of the Main Line and the St. Louis Division of the Chicago, Burlington & Quincy Railroad, and also of the Central Iowa. It has all the modern improvements and conveniences of cities of much larger population. A fine system of water works which supplies the city with pure artesian water; the principal streets paved with brick and lighted with electricity; and free postal delivery made to all parts of the city, are some of the material advantages. The city is noted for its fine churches; and for the intellectual and moral character of its people. The college building is situated in a beautiful campus of ten acres, covered with various kinds of forest trees. The entire building is heated with steam and lighted with gas.

LIBRARY.

It is impossible to over-estimate the benefit to those pursuing a college course of free access to well selected books. Few institutions afford library advantages superior to those of Monmouth College. Through the liberality of W. P. Pressly, Esq., the Warren County Library was established in 1870; and by an arrangement made by the College, this library is open to all the students, free of charge in the room. This is one of the best established, conducted and selected libraries in the West. Its endowment is about $20,000. It contains at present about fifteen thousand volumes, and some six hundred books of the best current literature are added yearly. Prof. Rogers, who has been the Secretary of the Library Association since its foundation, devotes much time to the careful selection of books to be purchased, and renders invaluable assistance to the students in finding works helpful in any investigation they may be pursuing. Connected with the Library is a large and pleasant Reading Room, supplied with all the leading papers, magazines and reviews, both English and American. In the number and expense of periodicals furnished, it is the first in the State outside of Chicago.

PHYSICAL CULTURE.

The Athletic Park.—There was a time in the earlier history of the College when open tracts of prairie surrounding the Col-

lege could be obtained for athletic exercises without cost, and in consequence the advisability of permanently securing such grounds was not felt. But through the growth and progress of the city, little by little the student was driven out, until the stern necessity confronted the authorities of the College that some place under their control must be provided for him or he will be tempted to spend his hours of recreation in places of resort which do not recreate.

In view of this, and of the fact that "during the period of growth the body needs quite as much training as the mind, and that a college which holds out incentives to intellectual progress should not overlook the bodily progress without which all intellectual prizes, when won, are useless," the Senate authorized and the Trustees secured an ideal Athletic Park just outside the city limits on East Broadway, three squares from the College campus.

That all the students shall have equal privileges and opportunities for culture in this department, and that vested rights and interests of the College shall not pass from under its control, the Athletic Association has been organized in like relation to the College as the Literary Societies — students only entitled to the privilege of membership.

Physical culture for the ladies has also secured attention. Miss Calvin, who has made a specialty of this subject, instructed a large class in "regular free gymnastics" during the first term, and in "æsthetic gymnastics and pantomimic action" during the winter term of the past year. It is the design to furnish equal advantages to both sexes, though in this department co-education in the same classes is not always feasible.

GYMNASIUM.

There is no Gymnasium under direction of the College, but the one in connection with the Y. M. C. A. is fitted up in the most modern style, and is well furnished with all the appliances of a first-class institution of the kind. A competent instructor in physical culture is one of the attractions. For five dollars a year students will be entitled, not only to all the privileges of the Gymnasium, but to the bath rooms, etc., of the Y. M. C. A. This is much cheaper and better than could be afforded under direction of the College.

The above for the present—but the authorities have in contemplation, in the near future, the erection of an Auditorium and Gymnasium on the campus, which will amply and conveniently provide for the physical culture of both sexes. Every thing looking to the physical, as well as to the intellectual and the spiritual culture of the students will be itself considered and provided according to the requirement of their greatest good.

REQUISITIES FOR ADMISSION.

1. Ladies and gentlemen are admitted to all privileges of the College on the same footing.

2. Applicants for admission to MONMOUTH COLLEGE will report to the President in his office for enrollment. Each applicant will obtain from the President an enrollment card giving directions whom to see for admission to the various departments.

3. The classification of all students applying for admission to MONMOUTH COLLEGE will be by examination, not by certificate, except as provided for in the following:

(1.) Students may be admitted to classes above Freshmen on the certificate of honorable dismissal from colleges of like standing with this. Candidates on furnishing proper certificates of their standing (blanks for said certificates being supplied by the College) shall be admitted from any one of the following schools to the Freshmen class without examination, in so far as these completed studies correspond with the studies below the Freshmen class:

The Albany Collegiate Institute, Albany, Oregon.
Monmouth High School, Monmouth, Illinois.
Xenia High School, Xenia, Ohio.
Marissa Academy, Marissa, Illinois.
Burlington High School, Burlington, Iowa.
Kewanee High School, Kewanee, Illinois.
Collegiate Institute, Geneseo, Illinois.
Davenport High School, Davenport, Iowa.
Rock Island High Sceool, Rock Island, Illinois.
Waitsburg Academy, Waitsburg, Washington.
Pawnee Academy, Pawnee, Nebraska.
Also on Regents' Pass Cards, New York.

(2.) Students coming from well established Academies and High Schools, whose course corresponds with that of this school, are requested to bring official certificates, *not Diplomas*, from such schools. These certificates shall state what subjects have been studied, with the time devoted to each, and the author of the text book used, and the standing in recitation and examination. Blank forms of such certificates will be furnished on application to the President of this College. These certificates will be used

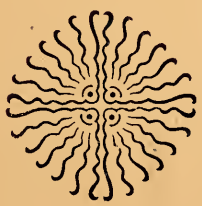
by each Professor holding entrance examinations, in determining the extent of examinations needful in his department. Applicants desiring to avail themselves of the benefit of these certificates must have them with them when they present themselves for admission.

(3.) Candidates for admission to the Junior Preparatory must be prepared for examination on Orthography, English Grammar to Analysis, Arithmetic, through Percentage and to any higher class, on the work or its equivalent, required in the lower class or classes.

(4.) The rank of each new student applying for admission is determined by balancing his credits and deficits.

(5.) Pupils admitted to any class must take all subjects in the course with that class, unless excused by examination conducted by the Professor to whose department the subjects belong.

(6.) No student of known immoral character, and none whose influence is likely to be injurious to good order, will be admitted. Applicants for admission, unknown to any member of Faculty, shall bring certificates of good moral character.



Outlines of the Work of Departments.

PHILOSOPHY AND REVELATION.

Empirical and rational Psychology is taken by the Senior Class four full hours in the week for four months. Bowen's Hamilton is the text book in use, with constant reference to consciousness as the book of final appeal. The Cognitions, sensibilities and conations are recognized as the three-fold phenomena of the indivisible thinking-subject, though the first is the subject of special consideration. That there is such a thing as a mental entity sharply discriminated from matter is emphasized; and the bridging over of the chasm between the two furnishes a problem of deepest interest. Hamilton's theory is by no means slavishly followed, in some of its phases it is positively rejected, but as a thought generating book the student is placed under the most favorable conditions to do his own thinking.

The History of Philosophy and Logic occupy the winter term of the Senior year. Lectures are given on the origin and progress of the philosophical METHOD in searching for the beginning of things. Though many theories and systems have been exploded, it is insisted upon that the METHOD of reasoning has preserved its identity through all the history of ancient and modern philosophy.

LOGIC.— Jevon's Elements is the text book. After familiarizing the class with the definitions of terms, propositions and the syllogism, exercises are given in deductive and inductive reasoning, and special attention to the detection of fallacies.

THE BIBLE is the unchangeable text book of the College. All the classes are required to recite in it what would be an equivalent to one hour each week. The Senior Preparatory Class receives instruction in the life of Christ, both in its historical and spiritual aspects, and always with the end in view of leading the student to "see the place where the Lord lay." The other classes, with the same end in view, are given instruction in the Bible with the help of Smith's Old and New Testament History, constant reference and appeal being made to the infallible record itself.

LATIN.

FRESHMAN YEAR.

For the Preparatory work necessary to secure Freshman standing in Latin, see the outline given under Topical Statement of work and books required in the Preparatory Department.

In the Freshman class training in Syntax is not neglected, but it gives place largely to the literary part of the work which from this point grows in prominence. Word formation, enlarged vocabulary, the study of clause relations, sentence building, etymological and rhetorical figures, structure of the paragraph, analysis of orations are topics which suggest the work of the year. Sight reading and translating at hearing take an increasingly prominent place in the course. During this year the aim will be to read as much Latin as possible. Selections from Cicero, or such other author as is deemed best, will be used. A thorough Preparatory Course is essential to success in this year's work.

SOPHOMORE YEAR.

In the case of students in the Scientific course, the study of Latin closes with the Freshman year. The Classical students and those pursuing the Literary Course, who elect Latin, study during the first term of the Sophomore year the Odes and Satires of Horace. The attention is now directed to the literary and rhetorical feature of the work read. Comparative study is introduced. Scanning, which was begun in Virgil, is here resumed and the various versification of the Odes is carefully studied. Mythological and historical references are investigated.

Topics are assigned for investigation in the Library, and oral or written reports are made by the pupils. Roman private life embracing customs, habits, governments, etc., is studied.

THIRD TERM.— During the third term, the Agricola and Germania of Tacitus are read, offering the student an opportunity to study in the one, a specimen of Latin Biography, in the other, to contrast the simple living of the Germans with the intricate life of the Romans.

TEXT BOOKS.

During the past year the following, in addition to those elsewhere named, were used: Allen and Greenough's Grammar, Johnston's Cicero, Chase and Stuart's Horace, Hopkins' Tacitus. Smith's Classical Dictionary is a required book of reference.

DEPARTMENT BOOKS OF REFERENCE.

A Department Library has been begun, which contains books of reference on Roman History, Roman Literature, and Roman life and customs. The list will be enlarged as fast as means are furnished. These books are for the use of this department. An assigned amount of reading on topics pertaining to this depart-

ment will be required from each pupil in the Freshman and Sophomore classes.

DEPARTMENT OF ENGLISH.

During the first four months of the Freshman Year, five hours a week are given to a study of the principles of Rhetoric. Composition work is required throughout the term. By assigning standard works for critical review, an effort is made to bring the student into contact with some of the best English writers.

Five hours a week of the Spring term are devoted to French's Study of Words.

In the Fall term of the Junior year, five hours a week are given to a general survey of the history of English Literature and a study of its historical development. In connection with this work, typical selections from representative authors are studied. The aim is to create a taste for what is purest and best in Literature, and to direct the attention of the student to the boundless riches therein contained.

The Seniors devote five hours a week, during the Winter term, to Shakespere. A critical study is made of three of his plays, the reading of others is required, and to each student one play is assigned for character study, upon which a carefully prepared paper is to be written.

The same time during each week of the Spring term is devoted to Milton. Two books of "Paradise Lost" and some of his shorter poems are studied, together with a history of his life and time.

GREEK.

The aim in this Department is to cultivate habits of attention, accurate observation, close reasoning and correct and vigorous expression; to give some idea of the wealth of thought here awaiting the earnest seeker, and to show something of the historical development of this people, whose language, literature and art have entered so largely into modern thought and modern progress.

Greek commences the beginning of the Senior Preparatory year and continues throughout the year, daily recitations. Harper's Inductive Method is used. The first book of Anabasis is completed.

In the Freshman year, the Anabasis is continued until it is read with a good degree of ease and appreciation.

The Grammatical work is a review of inflections and a study of Syntax, making special investigation of the principles of Con-

ditional Sentences and Indirect Quotations. In connection with the narrative, Greek Character is studied in the light of its versatility, reasonableness and endurance.

In the Sophomore year, the Orations of Lysias afford an excellent opportunity for an examination of the Athenian Legislative and Judicial Systems.

In connection with the Memorabilia of Socrates and Plato's Apology, Greek home life is investigated, also their views of morals and religion, marking in these lines the highest attainment of the human mind unaided by Divine revelation.

In Grecian History the endeavor is to fix in the mind leading facts and to study these facts in their philosophic relations.

The work of the Junior year is Demosthenes' De Corona- The structure and logic of the oration is studied, and the source of the orator's power is sought in his earnestness, honesty of pur. pose and intense patriotism. The course closes with the reading of Greek plays.

The allowance made by the Senate has been devoted to the purchase of books on subjects pertaining to the department. These have been found very helpful.

MATHEMATICAL DEPARTMENT.

The course of study in pure Mathematics is planned so as to be of the most benefit to the greatest number of our students. This course is absolutely needful for thorough understanding of the ordinary college text books of Natural Philosophy, Astronomy and Mechanics. It is taught so as to be of great advantage in forming habits of mental accuracy, of clearness in statement and of logical methods in reasoning and investigation. While a sound foundation is laid for advanced Mathematical work, students are specially prepared to understand those practical principles and problems which are most likely to be met with in their other studies, or in daily affairs, or in teaching. In all class-room work clearness of method and accuracy in results are deemed of essential importance. Oral instruction is constantly given on points not in the text books. As a large proportion of our students engage in teaching, the course includes especially such work as will best prepare for teaching the elementary Mathematics in the best common schools, high schools and academies.

Geometry is thoroughly studied. Its practical applications are taught. It is also made very valuable for mental discipline For this purpose the Euclidean methods, which have been so long deemed of the highest educational value, are combined with modern presentations of the subject. Algebra and Geometry are used in connection. Practice is given, not merely in recitations from

the text book, but also in devising proofs and tests. Many original demonstrations and solutions are required. The propositions which are practically most useful are especially studied and illustrated with numerical questions and graphical measurements.

A brief study of Trigonometry gives the student the essential elements needed to understand Astronomy and Physics. All the most useful principles of the mensuration of lines, surfaces and solids are thoroughly studied. These are applied to numerous problems. Logarithms are applied to calculations of all kinds, not merely to triangles.

Those desiring to study Civil Engineering and to learn the use of instruments, have the option of receiving instruction from a practical engineer and surveyor.

A Review of Mathematics, during the first session of the Sophomore year, covers more difficult work in Arithmetic, Algebra, Geometry and Mensuration. These subjects are studied in their relations to each other, their history and their more important abstruse applications. Many problems, new and old, of note or of special interest are discussed. Mere mathematical puzzles are avoided. Work is restricted to problems which illustrate important principles or useful methods of computation and solution. This review can to no extent take the place of prescribed previous work in these subjects. It requires full preparation.

Analytical Geometry is studied to the extent of acquiring the elements of the system and the most important properties of the conic sections, the spirals, the cycloids and other curves which occur in nature or are used in the practical arts. Concrete examples of these curves are constantly considered as well as the abstract theory. The graphical representation of variable facts and statistics by means of lines is explained.

Calculus may be briefly studied by those who desire it, so as to understand the method of the modern analysis and its application to problems in Curvature, Maxima and Minima, and to the universal methods of determining the Measurement of curves, surfaces and solids.

The text books in use at present are: Chauvenet's Geometry, (Byerly edition,) Newcomb's Essentials of Trigonometry, Hall's Mensuration, Ellwood's Table Book and Test Problems, Hardy's Analytical Geometry and Hardy's Calculus. Students are expected to retain for reference and for use in recitation, throughout this course, their previous mathematical text books.

ASTRONOMY is studied during the third term of the Senior year. Newcomb and Holden's Briefer Course is used as a basis of instruction.

The aim of this course, which is mainly descriptive, is to give the student an understanding of the fundamental facts and principles of Astronomy.

ECONOMICS, CIVICS AND PHILOSOPHY OF RHETORIC.

I. Political Economy.—The work of instruction in this subject aims to accomplish two main results. First, mastering the essential facts and leading principles of Economics, grouped under the four general heads, Production, Exchange, Distribution and Consumption. Second, the application of some of these principles to present problems. The aim is to train the student to such a knowledge of the subject as will fit him either for pursuing advanced courses in the Science, or more intelligently to study Social and Economic questions as a private citizen. The training process is by means of text book (Francis Walker's,) active class discussions and special reports, usually oral, on Topics assigned. The student is encouraged to investigate and think for himself.

II. Sociology.—Following the course in Political Economy, the same class (Junior) will take up the subject of Sociology and pursue it for six or eight weeks, five hours a week. Small and Vincents "Introduction to the Study of Society" will be used as a text book. Sociology, or the Philosophy of human society, is one of the newer sciences. A knowledge of its principles is important to all, especially to those who are to become leaders.

III. Constitutional Law.—This study is pursued by the Junior class, Spring term. The object of the instruction is to present to the student a clear exposition of the great principles of the Constitution, the process of their growth, and the Legislative provisions in which they have been embodied. Andrews' Manual of the Constitution is used as a basis of study. This is supplemented with explanations, class discussions and special reports on subjects involving Constitutional questions.

IV. Advanced Rhetoric.—The Junior class in all courses is required to study this subject, Winter term, five days a week. Whately's Rhetoric and Gilmore's Outlines are made the basis of the study. Argumentative Composition is made prominent. Making plans in the class room, without opportunity for previous preparation, is practiced. Each pupil is required to present a critical analysis of some masterpiece of oratory, Outlines of Argument, and a carefully prepared Argumentative Essay. A course of lectures on Oratory is delivered by the Instructor.

ETHICS AND EVIDENCES OF CHRISTIANITY.

1. Ethics is taught the Second term of the Senior year, six weeks, five hours a week. The instruction in this subject is conducted by recitations from text books and comments made by the Instructor. Full and intelligent discussion in the class room is

encouraged. The aim is to lead every student to a voluntary acceptance of the Moral Law as his guide in life, not by dogmatic assertions of any theory, but by an unbiased and intelligent study of the fixed and eternal principles of right.

2. Evidences of Christianity is pursued by the Senior class during the Spring term. The aim is not to cover the whole ground in the short time allowed, but to make a study of the topics most vitally related to the subject of Christian evidences. The personality of Christ is made the central argument. A comparative study of the other great historic religions of the world is made by the assignment of special topics for reports and reviews.

HISTORY.

General History is a required subject of the Sophomore Scientific, and is elective with the Junior class of the Literary course. It is pursued, fall term, five hours a week. Meyers' General History is used as a text book. The Stream of Civilization is followed from its rise down to the present time. The contribution of each nation to the world's advancement is noted, and the formation and growth of the modern states is carefully traced. As a knowledge of Geography is essential to a profitable study of history, maps are in constant use in class room work and the use of the historical atlas is required of the student in the work of preparation. Topics are assigned for special study, reports of which are made to class orally or in writing. The chief object aimed at is to equip the student with a clear outline of history as a foundation for more advanced study or intelligent general reading.

English History.—Students in the Classical and Literary courses take English History during the first half of the second year.

GERMAN.

German is offered in the Junior and Senior years to all those pursuing either the Scientific or the Literary course. Students may, however, elect German, Latin, or History in the Literary course.

The aim of the first year's work in German is to give the student a thorough drill in pronunciation, as well as a practical knowledge of the grammatical construction and idioms of the language. Varied selections, prose and poetry, from standard authors are translated, and exercises in conversation and composition given throughout the year. The natural and grammatical

methods of instruction are combined so as to secure the best practical results.

The aim of the second year's work will be to widen the literary as well as the conversational vocabulary of the pupil and to acquaint him, through translation, with standard works of classical German authors.

The following text books will be used: The Joynes-Meissner German Grammar, Joynes' Reader, Schiller's Wilhelm Tell, Goethe's Hermann and Dorothea, Studien und Plaudereien. Other texts to be selected.

ELOCUTION.

The aim of this Department is to make natural and effective readers and speakers, and to develop as far as possible the individuality of the student. "Not imitation, but creation, is the aim." Students in all courses are entitled to the equivalent of one recitation per week in ELOCUTION during the Sophomore, Junior and Freshman year.

The first year's work includes free gymnastics, with a special view to chest development, exercises in breathing and vocal culture, and drill in articulation and enunciation, followed by critical study of various selections from English Literature. Individual work is also required of each pupil, who thus has the advantage of special criticism.

In the Sophomore year, vocal and physical culture is continued, and work in gesture begun, some attention being given to the Delsarte system. Individual performances are required and special study is given to the oratorical selections.

In the Junior year more advanced work is taken up along the same lines. Study is given to the philosophy of expression and the principles of Elocution. Dramatic selections are analyzed and work in gesture continued. Some attention is given to the reading of the Scriptures.

The regular course of instruction, including personal training for all public exhibitions required of the students by the College, is furnished without extra expense to the student. A limited amount of special instruction can be secured by the student at a moderate cost.

"Cumnock's Choice Selections" will be used as a reader. Other texts furnished by the Instructor in charge of Department.

BIOLOGICAL DEPARTMENT.

The Laboratory is supplied with compound microscopes, dis-

secting microscopes, microtomes, water baths and other appliances for the study of animal and vegetable tissue. Fifteen Leitz' microscopes of convenient laboratory form, one large and very complete Leitz' and one Zeiss' Paul Mayer dissecting microscope form part of the outfit. Desks and apparatus are provided for eighteen students in the laboratory. A few good models and illustrative specimens are possessed by the College. It is not desirable to build up a museum of curious things, but a well selected collection of typical animal and vegetable specimens and models will be brought together as rapidly as circumstances will permit.

It is the aim in the Biological Department to bring the student into direct contact with nature. Living things are studied, not books about living things.

GENERAL BIOLOGY.

In the course in General Biology the object is to give a clear conception of the nature of living matter, the cell, protoplasm, the building up of tissues and of organisms, and to present a rational basis for classification. The instruction is by lecture and laboratory work, especial stress being laid upon the latter. A few typical animals and plants are studied with considerable thoroughness. The student records the results of his work by notes and drawings. In the present year the forms selected were the earthworm, mussel, clam, hydra, vorticella, amœba, yeast plant, protococcus, moulds, chara, fern, flowering plant. The course will vary from year to year. No text book is used. The method is essentially that indicated in Huxley and Martin's Biology.

BOTANY.

The course in Botany is intended to give the student some conception of the relations and properties of plant life. The flowerless plant receives attention as well as the flowering plant. Structure and development are studied practically in the laboratory. The work is such that it can be taken up without previous botanical study, but some preliminary training is desirable. The so-called "analysis" of plants is in no sense a substitute for this course.

Bessey's Botany and Gray's Manual are used.

ZOOLOGY.

The course in Zoology and Embryology continues in a more systematic way the work begun in the General Biology. Fuller opportunity will be given for attaining skill in microscopical technique. In the spring the embryology of the chick is studied in the laboratory and by the aid of lectures and reference reading

BROOK'S HANDBOOK OF ZOOLOGY and FOSTER AND BALFOUR'S EMBRYOLOGY are recommended.

PHYSIOLOGY.

See Preparatory Department.

DEPARTMENT OF PHYSICAL SCIENCE.

The Department of Physical Sciences includes the subjects Chemistry and Physics.

CHEMISTRY.

1. GENERAL CHEMISTRY.— The fall term is required of the Sophomore Scientific and Junior Classical students. Remsen's Briefer Course is used as a text book, and his Laboratory Manual in the laboratory. The class work consists of lectures with recitations on these, and the text and the laboratory work. In the laboratory, the student from the first becomes familiar with chemicals, their nomenclature and properties. The subject is developed on the logical basis of the Periodic System. Some work is required of each student in the way of the history of chemistry and biography of chemists.

2. QUALITATIVE ANALYSIS.— The Sophomore Scientific students continue the study throughout the year. A system of qualitative analysisis developed and used both for acids and bases. The student thus learns how to identify and separate the common elements and acids by actual practice on unknown solids and solutions. Believing that a knowledge of the methods for the preparation of inorganic substances is as essential to a well-balanced course as is the knowledge of the methods of qualitative analysis, each student will be expected to prepare and purify some inorganic compounds.

In addition to the laboratory work, lectures and recitations are given on the subjects in hand in the laboratory work, using the larger manuals and text books for reference.

3. QUANTITATIVE ANALYSIS.— During the fall term of the Senior year, the Scientific students continue the study of chemistry. A part of the time will be devoted to volumetric and gravimetric quantitative analysis,— such as water analysis, gas analysis, and a few of the simpler gravimetric determinations.

4. ORGANIC CHEMISTRY.— Part of this last term will be devoted to Organic Chemistry. Remsen's Organic Chemistry will be used as a text book. A number of the experiments here given will be performed by the student. Lectures and recitations will also be given.

The work under 2, 3 and 4 will be varied to suit the needs of the classes. The aim is to have the student obtain a useful

knowledge of the subject rather than to put him through a set form of study.

PHYSICS.

During the Winter and Spring terms the Junior Classical and Scientific students pursue a course in advanced Physics. The Junior Literary are also given a choice between this subject and Zoology.

Laboratory work will be carried on from the beginning as in the chemical work. Written directions are mostly used in the laboratory work, and as many quantitative experiments as possible are given in order to train the student in accuracy of hand, eye and ear.

Each year many additions are made to the stock of apparatus available to the student for laboratory work.

COURSES OF INSTRUCTION.

CLASSICAL COURSE.

FRESHMAN CLASS.—First term.

Greek—Anabasis.
Composition and Rhetoric.
Geometry.

SECOND TERM.

Botany.
Latin—Cicero.
Trigonometry and Mensuration.

THIRD TERM.

Botany.
Latin—Cicero.
Trench on Words.

SOPHOMORE YEAR.—First Term.

Greek—Memorabilia.
Spherics and Mathematical Review.
Latin—Horace, Odes and Satires.

SECOND TERM.

Greek—Lysias.
Analytics.
English History.

THIRD TERM.

Greek—Plato.
Analytics.
Latin—Tacitus.

JUNIOR YEAR.—First Term.

Chemistry.
English Literature.
Political Economy and Sociology.

SECOND TERM.

Physics.
Greek—Demosthenes de Corona.
Advanced Rhetoric.

THIRD TERM.

Physics.

Greek—Demosthenes de Corona.
Constitution.

SENIOR YEAR.—First Term.

German.
Psychology and Metaphysics.
Greek—Prometheus Bound and Alcestes.

SECOND TERM.

Ethics.
Logic.
Shakespeare.

THIRD TERM.

Shakespeare.

THIRD TERM.

Christian Evidences.
Milton.
Astronomy.

In all courses the Junior, Sophomore, Freshman and Senior Preparatory classes take Bible in the forenoon. Also, in all courses the Juniors, Sophomores and Freshmen take elocution in the forenoon.

SPECIAL COURSE.

I. The Special Course includes nine departments, in one or more of which a student may graduate with Honors, first or second, according to the attainments made. These Honors are in no sense competitive. As many as complete the course receive them.

The departments of the Special Course are as follows:

II. 1, Christian Ethics; 2, Philosophy; 3, Natural Science; 4, English Literature; 5, Mathematics; 6, Greek Language and Literature; 7, Latin Language and Literature; 8, German; 9, History.

III. Students will not be admitted as candidates for Honors in Greek, Latin, Mathematics or German later than the second term of the Sophomore year;. in Natural Science, English Literature, or History, later than the first term of the Junior year; in Philosophy or Christian Ethics, later than the first term of the Senior year.

IV. No student will be admitted to examinations for Honors unless the average of his recitations and examinations in each subject the term preceding shall be 8.5.

V. In general, not exceeding one-half as much matter in addition to the amount required in the ordinary course, in any of the above departments, must be mastered in order to a second Honor; and an amount equal to that required in the ordinary course in order to a first Honor.

VI. Honor examinations will be held the first week of each vacation, Senior included, at which candidates for the degree of A. B. or B. S. may present themselves, and those passing in any subject in any department shall be credited with the same. In case of every candidate, the result of all the examinations will determine the Honor attained.

VII. Alumni may in like manner present themselves for examination in any of the departments named above, at any honor examination, and those passing in any subject will be credited with the same.

VIII. The result of all these examinations will be entered on the College Register.

PREPARATORY DEPARTMENT.

Careful preparation, under competent instructors, is necessary for the work in higher classes. To furnish this in the best manner MONMOUTH COLLEGE maintains a well equipped Preparatory Department.

The special object of this department is to prepare students thoroughly for entering the Freshman Class. The course is arranged with reference to the various departments in the college course, and the studies pursued have direct bearing upon the work which follows. Thus time is economized and the preparation unified.

Parents can send their sons and daughters here with the perfect assurance that they will be cared for and trained in the essential branches which will prepare them for the Freshman Class.

The Preparatory Course consists of three years, designated as Junior, Middle, and Senior. The work of the Junior Class is fifteen recitations per week throughout the year; of the Middle Class during the first and second terms, twenty recitations per week, and during the remainder of the year fifteen per week; in the Senior Preparatory Class, twenty recitations per week throughout the year is the required work.

CONTROL.

The Department is under the general superintendence of the President and Faculty, and the special supervision of the Vice President. The instruction is in charge of the Professor at the head of each of the various departments in College.

ADVANTAGES.

All the advantages in the way of Libraries, Literary Societies, Laboratories, Lectures, Christian Union, and other features of the College are open to the pupils in this Department.

ENGLISH DEPARTMENT.

There are many young men and women who have not the time, means or inclination at present to pursue a thorough course of training, who, nevertheless, desire a good English education coupled with the advantages of College associations. For this class we have provided the best facilities possible in our

ENGLISH COURSE.

This course, as its name suggests, is restricted to the English language. It offers training in the Departments of English,

Science, History, Civics and Mathematics. Such a course is calculated to create a desire in the student pursuing it for future study and higher training. Its design is to furnish a practical education and prepare young men and women for business. It furnishes teachers a favorable opportunity to prepare themselves for higher and better positions. It offers excellent facilities to any who are wishing to prepare to enter regular classes, but who feel the need of a fuller acquaintance with the common school branches. Admission to this Department is gained in the same manner as to the Preparatory. It has the same advantages and is controlled as the Preparatory Department.

TOPICAL STATEMENT

OF WORK OFFERED IN THE PREPARATORY AND ENGLISH DEPARTMENTS.

ENGLISH.

During four months of the Junior Preparatory year, five hours a week are given to English Grammar. This is meant to be a review of the subject, and not a study of Elementary Grammar. In the Middle Preparatory year, five hours a week for five months, are given to Elementary Rhetoric. During the remainder of the second term, special work in English is given one recitation period each week. Daily composition work is required that the student may acquire skill in applying the principles of Rhetoric.

LATIN.

General Statement.—The Roman pronunciation is used throughout the course. Five recitations per week are required. Applicants for the Latin Department will be tested to determine their knowledge of the language. Ability to use, and not quantity alone, will fix the standing given the pupil. Quality of the work done and quantity of Latin read will be carefully inquired from each applicant, with the object in view that we may know how much he knows and what he can do with his knowledge.

First Year—Junior Preparatory.—The work of the first year, stated generally, includes (1) learning to pronounce accurately and read intelligently the Latin text studied; (2) the mastery of inflection so that number, case, mode, tense, etc., can not only be instantly recognized, but also formed without hesitation; (3) the acquisition of a working vocabulary; (4) the order of the Latin sentence understood; (5) the mastery of the simpler principles of Syntax; (6) learning how to understand simple narrative in Latin; (7) learning how to translate into true English. Daily practice is given in writing Latin, in answering in Latin ques-

tions based on the text, and in translating Latin on hearing. During the third term, Gradatim or the Viri Romae will be read as a transition from the beginner's book to the reading of Caesar.

SECOND YEAR—MIDDLE PREPARATORY.—During the first and second terms Caesar is read. Latin composition is required daily. Close attention is paid to Syntax. Daily practice in pronouncing Latin is given. Easy sight reading is introduced. A study of the Roman camp, fortifications, army, weapons, geography, etc., is made. Special topics are assigned the pupils, which they are to investigate and upon which they are to prepare papers to be read in class. During the third term Sallust's Catiline is read. A course in Roman History is given through the second term.

THIRD YEAR—SENIOR PREPARATORY.—The first term of this year is devoted to the study of Cicero, the orations against Catiline being used. An inductive study of one or more of these orations is made. Syntax, especially that of the verb, receives particular attention. A comprehensive review of Syntax is made. Latin prose composition based on the text read will form a part of each recitation. During the second and third terms Virgil is the Latin studied. A careful study of quantity and of the dactylic verse is made and ready scansion is required. Figures of speech are studied and mythological references are explained.

BOOKS USED.—The right is reserved in the Latin department to change the text or vary the subjects whenever necessary. During the past year Harper & Burgess' Latin Primer, Harper & Tolman's Caesar, Harper & Miller's Virgil, Johnson's Cicero, Rigg's Composition, Parts I. and II., and Allen & Greenough's Grammar have been used. Smith's Classical Dictionary is a required book of reference to be owned by the pupil. The other texts needed in this Department will be announced later.

GREEK.

Greek begins with the Senior Preparatory. Harper's Inductive Method is used, special attention being given to forms, grammatical structure and the acquirement of a vocabulary. There are daily recitations throughout the year.

MATHEMATICS.

Students in the Junior Preparatory Class study Arithmetic in all its ordinary applications. Without this knowledge failure is likely in more advanced work. For this reason and because of its practical importance this subject will be insisted on.

Algebra is studied for one year and a half. The following subjects are considered the most important. Ordinary operations with Polynomials and with Fractions, Factoring, Simple and Quadratic Equations of one or more unknown quantities, Radicals, Proportion, Progressions, Permutations, and the applications of

the Binomial Theorem. The solution of numerous concrete problems and the use of tests and proofs accompanies the entire study. A brief outline is given of the Higher Equations and considerable time is spent on the applications of Algebra and on the use of Logarithms in ordinary computations and in the solutions of problems in Interest and Annuities.

Plane Geometry is studied in the Preparatory Department during one-half year. It is essential that it be so mastered that demonstrations can be given accurately and that the student can apply the principles learned to Theorems, Problems and Numerical Computations not explained in the text book. Wentworth's shorter course in Algebra has been used during the middle year. Bowser's College Algebra and Chauvenet's Geometry are used during the third year and retained for use in the College classes.

HISTORY AND CIVICS.

I. United States History is pursued by the Junior Class the entire year, five recitations a week. Johnston's text book is used as a basis. As a clear understanding of history cannot be obtained without maps and charts, a free use is made of both. Direction is given in collateral reading. Growth in territory, population, industry, wealth, influence, etc., is carefully traced out. Causes and results of the wars are made prominent. The history of the great political questions is emphasized. The aim is to fix in the mind of the student a clear outline of our history as a Nation.

II. Roman and Grecian History is taken up by the Middle Year Class before the close of the fall term and pursued the remainder of the year. Not only is a knowledge of the facts and philosophy of the history of those great nations of antiquity aimed at, but the basis is also laid for a better understanding of the Greek and Latin languages, the study of which the student shall have already commenced or will soon begin.

III. Civics.—The same class studies Civil Government the first twelve weeks of the fall term five days in a week. Fiske's Civil Government is the text book used. Recitations are conducted according to the plan of the text book, viz., by questions on the text and suggestive questions for outside investigations. Attention is given to the origin and growth of township, county, city, state and federal governments. The object is the mastery of fundamentals and laying of a foundation for advanced work in the college course.

PHYSIOLOGY.

The instruction in this subject is arranged to give training and mental discipline as well as useful information. The work is made thoroughly practical. The human skeleton is studied in

the laboratory. Other laboratory work is given. The student learns to see with his own eyes—to gain some knowledge that is not second-hand. Hygiene is viewed not as a mass of rules, but as logical deductions from natural laws.

MARTIN'S HUMAN BODY (briefer course) is the text book.

GENERAL BIOLOGY.

General Biology is begun in the Senior Preparatory year at the beginning of the Winter Term and continued throughout the remainder of the year. The general treatment of the subject is similar to the course in General Biology for the Fall Term of the Freshman year.

SEDGWICK & WILSON'S BIOLOGY is the text used.

PHYSICAL SCIENCE.

The Senior Preparatory Scientific and Literary are given a course in Physical Geography during the fall term as a general introduction to the physical sciences.

ELEMENTARY PHYSICS.—The course occupies the winter and spring terms of the Senior Preparatory year. After a few weeks of study and recitation, part of the time will be given to laboratory work.

CARHART & CLINTE'S text will be used.

MUSICAL DEPARTMENT.

Owing to the widely spreading interest in Music in general and the frequent demands for it in connection with the College course, the Senate and Faculty have established a Musical Department in MONMOUTH COLLEGE.

The success that has attained in this department since its opening unmistakably proves the wisdom of the Board in establishing it.

Prof. E. C. Zartman has been chosen Professor and Director of the Department. Prof. Zartman was for some years a pupil of the late Prof. Karl Merz, Musical Director of Wooster, Ohio, and under the direction of this eminent instructor and author attained a high degree of culture in his chosen field of labor. Prof. Zartman will devote his whole personal attention to the giving of lessons to pupils and looking after the interests of this Department.

It is not the intention to teach Music merely as an ornamental branch, but to make it a part of a complete education, a higher culture. Hence, with this idea in view, Music has been placed on an equality with other studies in the curriculum.

The following branches will be taught: Piano-playing, Organ-playing, Cultivation of the Voice, Chorus Singing, Harmony and Musical Composition.

Those desiring private instructions will be accommodated; however, the class system, being long recognized as highly beneficial in its results in other schools of music, has been introduced here.

By this means the cost of musical instruction is brought within reach of persons of limited means, and it is also found that the corrections made for the benefit of one pupil prove likewise beneficial to the others in the class. To play and sing before others is quite a trial for many pupils, and in this the class is found valuable in overcoming this diffidence. It also excites a friendly rivalry that is both stimulating and healthful. Two pupils are considered a class. A musical education is two-fold—an accurate technic must be acquired, and a correct taste developed; hence, close attention will be paid to technical studies, while the best

works of the masters will be introduced as the progress of the pupil may require.

PIANO FORTE.

The great diversity of talent, the ultimate object in the study of music, and the various stages of acquirement of pupils, render it impossible to lay down a course adapted to all pupils. However, the studies or their equivalent, as given in the course below, will be pursued in connection with as many of the principal works of the best Classical, Romantic and Modern composers as it is possible to study thoroughly, with a correct execution and interpretation, in the time necessary for the completion of the course.

First Year.—Mathews' Graded Course of Studies, Vol. I; Six Easy Studies, op. 314, De Kontski, together with pieces suitable to this grade.

Second Year.—Mason's Touch and Technic; Melodious Studies, op. 52, Book I, Loesschhorn; Intermediate Degree, op. 66, Book I, Loesschhorn; Studies, op. 29 and 32, Bertine; Mason's Accentuated Scales and Arpeggios; Mathews' Phrasing Studies, Book I.

Third Year.—Krause, op. 2, Book I, (Trill Studies), Czerney School of Velocity, op. 299, Books I, II; Bach's Two- and Three-Part Inventions; Czerney and Kullak's Octave Studies.

Fourth Year.—Tausig's Daily Studies, Book I; Studies from Cramer (Von Bulow edition); Selections from Bach's W. T. C.; Select Etudes from Raff, Henselt and Chopin.

To complete this course satisfactorily requires four years of faithful study by the pupil of average ability. During this course Harmony and Composition must be studied two years, and History one year.

VOICE CULTURE.

The study of Vocal Music ought to commend itself to pupils of every institution of learning. Aside from being an agreeable diversion in the home circle, as well as a highly desirable accomplishment, it is well known to be beneficial to all, as it is a healthful exercise; for by its judicious daily practice the lungs are expanded and the vocal organs strengthened. Students in this Department will be taught the correct management of the breath, tone placing, sustained tones, and at the same time securing agility and flexibility of the voice. To this end will be used Lablache or Panseron's methods, supplemented by studies from Concone, Abt's vocalizes and solfeggios, etc. The German Lied, the Italian Aria, the sacred song as well as the ballad, will all receive attention. The length of the course depends upon the difficulties in the voice to overcome, but is in its extent somewhat like the piano course.

HARMONY.

Emery's Harmony will be the text book, supplemented by Emery's Additional Exercises.

HISTORY.

Ritter's text book will be used, supplemented by the biographies of the Masters, Beethoven and Mozart, and Mendelssohn's Letters, Merz's Hints, Fillmore's History of Piano Music.

CHORUS SINGING.

It is found that chorus singing cannot be carried on with any degree of success in colleges and seminaries admitting but one sex, but in a co-educational institution like our own the facilities for chorus singing have already proven themselves ample. Persons entering the Chorus Class are charged a nominal fee, which barely defrays incidental and other expenses connected with the class.

CONCERTS AND RECITALS.

Recitals, to which the public is cordially invited, are given from time to time by the pupils of the Department. It has been the custom in the past to give a concert as a part of the Commencement exercises at the close of each college year.

REQUIREMENTS FOR GRADUATION.

A diploma will be given to all those who have spent at least one year in our institution, and have finished the prescribed course, including the work in Harmony and History.

MISCELLANEOUS ITEMS.

Students may enter at any time, but are not enrolled for less than one term.

Pupils should report to the President of the College, with whom they will make all their arrangements for entrance.

The privileges of the Musical Department are not extended on the same grounds to holders of scholarship and half-rate tuitions, as are the privileges of the other departments of the College.

All persons who have studied music will, upon examination, be allowed to enter the course for graduation at the point where their proficiency will admit.

Two years of music will be accepted for German.

Students attending College and desiring to receive instruction in music, are expected to take lessons from the Professor and Director of the Department.

No student connected with the institution will be credited with lessons taken elsewhere, except by special permission of the Faculty.

RATES OF TUITION.

Tuition per session, payable in advance, two lessons per week.

FALL SESSION—SIXTEEN WEEKS.

In Classes—Piano and Voice Culture and Harmony, each	$18.00
Private Lessons—Piano, Voice Culture and Harmony, each	27.00
Harmony, in classes of six	6.00
History of Music	3.00

WINTER SESSION—TWELVE WEEKS.

In Classes—Piano, Voice Culture and Harmony, each	$14.00
Private Lessons—Piano, Voice Culture and Harmony, each	22.00
Harmony, in classes of six	5.00
History of Music	3.00

SPRING SESSION—TEN WEEKS.

In Classes—Piano, Voice Culture and Harmony, each	$12.00
Private Lessons—Piano, Voice Culture and Harmony, each	18.00
Harmony, in classes of six	5.00
History of Music	3.00

All classes are of three-fourths of an hour each; private lessons are three-fourths of an hour each. Good pianos and organs can be rented at the expense of the pupils, or they may bring their own instruments if they prefer.

Text Books and Books of References.

The right is reserved to change at the beginning of a subject, any text book.

ETHICS.—Fisher's Evidences of Christianity, Wayland's Moral Science.

NATURAL SCIENCE.—Remsen's Chemistry, Young's General Astronomy, Bessey's Botany.

LATIN LANGUAGE.—Allen & Greenough's Latin Grammar, revised edition; Johnston's Cicero, Chase & Stewart's Horace, edition of 1892; Hopkins' Tacitus; Smith's Classical Dictionary; Pennell's Roman History.

GREEK LANGUAGE.—Goodwin's Greek Grammar, revised edition; Goodwin's Anabasis with White's Vocabulary—Memorabilia, D'Ooge's Demosthenes, Whiton's Lysias, Dyer's Apology and Crito, Mather's Prometheus Bound, Myers' Grecian History, Liddell & Scott's Intermediate Greek Lexicon.

MATHEMATICS.—Bowser's College Algebra, Chauvenet's Geometry, Newcomb's Essentials of Trigonometry, Ellwood's Test Problems, Hardy's Analytical Geometry and Calculus.

GERMAN.—Joynes- Meissner German Grammar, Joynes German Reader, and other selections from German Literature.

PHILOSOPHY.—Bowen's Hamilton, Jevon's Logic, Whately's Rhetoric, Francis Walker's Political Economy, Andrew's Constitution of the United States, revised edition.

ENGLISH LANGUAGE.—Shaw's New English Literature, Hart's Composition and Rhetoric, Trench's Study of Words, Montgomery's English History, Myer's General History.

ELOCUTION.—Cumnock's Choice Readings, Murdock's Vocal Culture.

PREPARATORY.

Allen & Greenough's Latin Grammar, revised edition; Harper & Burgress' Latin Method, Harper & Tolman's Cæsar, Harper & Miller's Virgil, Riggs' Composition, Reed & Kellogg's English Grammar and Composition, Wentworth's Shorter Course Algebra, Dole's Science of Government, Wentworth's and Bowser's Algebras, Chauvenet's Geometry, Goodwin's Greek Grammar, Harper & Water's Greek Method, Martin's Human Body, Johnston's United States History, Hinman's Physical Geography, Carhart and Clinte's Physics.

REGULATIONS OF THE SENATE.

I. The Statutes of the College, Chapter ii, Section 3, provide that "No student shall be permitted to enter at a later period of the course than the commencement of the first session of the Senior year." The spirit of this law, in the judgment of the Faculty, requires at least one full year's attendance of a student on the exercises of the College in order to graduation. *Under no circumstances* will this rule, as thus interpreted, be relaxed while the above statute remains unrepealed.

II. The Senate has adopted the following as an additional chapter to the College Statutes:

SECTION 1. All persons matriculating shall be regarded as students, and on payment of the required fees shall be entitled to all the privileges of the College.

SEC. 2. Connection with the College is terminated by graduation or dismissal, honorable or otherwise.

SEC. 3. The privileges of the student shall be suspended in all cases of failure to pay the required fee and attend on instruction. Provided, however, that the following privileges, namely, that of examination with his classes, active membership in the societies, representing societies and classes on public performances, and the use of the library and reading room, may be granted to students temporarily absent, for a period not exceeding one year, on written permission from the Faculty, and the payment of two dollars per term.

SEC. 4. All persons enjoying any of the above privileges shall be subject to college discipline, the same as if in actual attendance.

III. If any student shall be admitted after the beginning of a session and before the middle of it, he shall pay the fee accruing on the whole session. If admitted at or after the middle of the session, he shall pay half thereof.

The statutes expressly forbid the students to use intoxicating drinks as a beverage, or play cards, to frequent drinking, gambling or billiard saloons, or improper places of resort of any kind' The Faculty judge places of amusement commonly called "balls' or "dances," to be improper places of resort for students.

At the meeting of the Senate in June, 1874, the following was added to the Statutes of the College as Section 4 of Chapter xii:

"It shall be unlawful for any student of the College hereafter to become a member of any secret college fraternity, or to connect with any chapter of any such fraternity, and also for any active member of any such fraternity to be admitted as a student of this College.

Special Regulations.

1. No student should enter the Freshman Class of any course until fully up with it.

2. All students should take one of the prescribed courses and pursue it regularly; but those not wishing to do so are permitted to select such subjects as they are competent to study, and can recite with regular classes, provided that they pass the examination which would entitle them to pursue the subject if in a regular course.

3. All the students are required to attend the worship of God in the chapel daily. Students in the Classical, Scientific and Literary Courses will study select portions of the Scriptures, in addition to the usual text books on Moral Philosophy and the Evidences of Natural and Revealed Religion. The President will give frequent lectures on manners, morals and religious duties, intended to train the students to the life of Christian ladies and gentlemen. All who do not reside with their parents are required to attend public worship and Bible class in some church on the Sabbath. Students' prayer-meetings are maintained and well attended. The Students' Christian Union, an association of students and professors for the promotion of their spiritual welfare and the cause of Christ in the College, holds regular monthly meetings on the first Sabbath of each month. The Faculty regard it as an important part of their work to labor for the moral and spiritual welfare of the student.

DEGREES.

The degrees B. A., B. S., B. L. and B. M. are conferred after the satisfactory completion of the respective courses.

A certificate of attainments will be given those who complete and pass satisfactory examinations in the English course.

The Masters' degrees are open to Bachelors of this institution or of any other college of equal rank upon the following conditions:

1. Candidates may receive a Master's degree, *pro merito*, three years after graduation upon passing a satisfactory examination in one major and one minor subject. These studies are to be chosen under the advice of the head of the department in which the major part of the work is done, by whom also the examinations

are conducted. A thesis must also be presented as early in the year as the first of May on a theme connected with this study, embodying results of careful investigation.

2. Candidates may receive a Master's degree upon presenting satisfactory evidence of having pursued a professional course such as a certificate of graduation from a Theological Seminary, Law School or Medical College, and by submitting a thesis on subject connected with such a course of study, embodying results of careful investigation and advanced work. This degree may also be conferred upon those furnishing a certificate of one year's satisfactory graduate work done in an accredited University.

Those desiring a Master's degree must make application to the President at least one month before Commencement, and deposit a fee of $6.00 with the Treasurer.

In regard to grading, examinations, credits, and honors the following principles have been adopted.

2. Each class is examined on each subject as soon as completed. To pass the student must answer correctly at least 70 per cent. of all questions asked him. No student is credited with any subject until he has been examined and passed in it.

Honors are in no sense competitive; the student is ranked upon his own merit, not upon his comparative standing.

All the students pursuing a subject are ranked according to their work as A, B, C, D, or E.

A indicates work passed with honor.

B " " " fairly.

C " simply passed.

D " work on which examination may be taken after review.

E indicates work must be taken again in class.

Each professor determines the rank of his pupils in his own way.

Every student whose average rank is nearer A than B is entitled to first honor.

Every student whose average rank is nearer B than C is entitled to second honor.

The average for honors at graduation is taken for the last two years of the course.

REPORTS.

Reports are sent to parents or guardians at the close of each term. The President should be notified of every case where report fails to come within ten days after the close of the term.

CLASSIFICATION.

The rank of each new student is determined by balancing his credits and deficits, but in promotions the student's credits and deficits are not balanced.

Junior Preparatory students are advanced to Middle Preparatory rank if they have no entrance conditions, and not more than ten months back in Junior Preparatory.

Middle Preparatory students are advanced to Senior Preparatory rank if they have no Middle Preparatory conditions, and not more than ten months back in Middle Preparatory.

Senior Preparatory students are advanced to Freshman rank if they have no Junior Preparatory conditions, and not more than ten months back in Senior Preparatory.

Freshmen, Classical and Scientific, are advanced to Sophomore rank, and Freshmen, Literary, to Junior rank if they have no Preparatory conditions, and not more than ten months back work in Freshman.

Sophomores are advanced to Junior rank if they have no Freshman conditions, and not more than ten months back work in Sophomore.

Juniors, Classical and Scientific, are admitted to the Senior class if they have no Sophomore conditions, and not more than five months back work in Junior.

Juniors, Literary, are admitted to the Senior class if they have no Freshman conditions, and not more than five months back work in Junior.

ASSIGNMENTS.

Students upon entering College are assigned a rank according to the rules for classification. Assignments to advanced rank are made at the close of each term. The assignment given at the close of the Winter Term determines the classification of the students in the Catalogue.

EXAMINATIONS.

Each class is examined in each subject when completed. These examinations may be either oral or written, or both, as may be thought best by the Professor in charge of the department.

Students absenting themselves from the regular examination of their classes will be charged one dollar for private examinations in each subject. A receipt from the Treasurer, showing that the examination fee has been paid, must be presented before examination is given.

Students may bring up back work under personal instruction of the Professor in charge of the department, or some one whom he may appoint. For such instruction a small fee will be required.

SPECIAL EXAMINATIONS.

Examinations are held for students making up back work on the last Saturday of each term. Students intending to take

such examinations must notify the Professor in charge of the department in which examination is desired at least two days preceding the date of examination. Before examination is given, a receipt from the Treasurer showing that the examination fee has been paid must be presented.

GENERAL REGULATIONS.

1. Students are requested to notify the President before changing their places of boarding.

2. No student is allowed to change his subjects of study without permission of the Faculty; nor is he permitted to change from one course to another, except at the beginning of the year, without the consent of the Faculty.

3. A pupil with back work is due and shall recite in the class pursuing that subject unless he make satisfactory arrangements for making up the back work with the Professor in charge of that department.

MATTERS OF INFORMATION.

SOCIETY PRIZE CONTESTS.

The Eccritean Society has three annual contests among its own members, viz: A Declamation contest, prizes $5.00 and $3.00; an Essay contest, prizes $7.00 and $5.00; and an Oration contest; called the McKelvey Oration contest, prizes $10.00 and $5.00.

The Philadelphian Society has two annual contests among its members, viz: A Declamation contest, prizes $5.00 and $3.00; and an Oration contest, called the Elliott-Cleland Oration contest, prizes $10.00 and $5.00.

The Aletheorian and Amateur des Belles Lettres, the ladies societies, have similar contests.

The Philo-Eccritean contest occurs this year on Commencement evening, June 14th. This contest embraces ten points: Declamation, 1; Essay, 2; Oration, 3; Debate, 4. The interest centering in the contest makes it the literary event of the year.

STUDENTS' LECTURE COURSE.

Under the auspices of the Philadelphian and Eccritean Literary Societies the following lectures and entertainments have been given in the College Chapel within the College year: Marie Decca Concert Company; Robert Nourse, "John and Jonathan"; Russell H. Conwell, "Silver Crown"; John Temple Graves, "The Reign of the Demagogue"; the Temple Quartette; Prof. John B. De Motte, Ph. D., "The Harp of the Senses; or, Character Building".

These entertainments have been well patronized and have furnished the students an opportunity, at a trifling outlay, of hearing representative American and English platform orators. A similar course will be given the coming year.

UNIVERSITY EXTENSION.

During the coming year Professors Maxwell and Swan are prepared to give courses of lectures on Physiology and Chemistry. While these subjects will be treated in a scientific way, and in the light of the most advanced thought and experiments, yet in a way highly practical, so as to bring them within the comprehension and appreciation of all.

Prof. J. H. McMillan has also prepared, and in several places

delivered, a course of lectures on Bible study, which has been well received. The course is given in six lectures and embraces the Exilic and Post-Exilic History of Israel. A special study is made of the Post-Exilic prophecies.

It is thought that every school should be a raditory center, and that College Extension is an excellent system of radiation.

These courses can be obtained by committees and associations outside of Monmouth for fifty dollars each and expenses.

GOVERNMENT.

It is the aim of the Faculty to secure good order and diligence in study by force of moral and religious principles, rather than by direct exercise of authority. Those who persist in neglecting their studies, or in pursuing disorderly courses, or in exerting an evil influence, will not be permitted to remain in College.

EXPENSES.

First Year, English and Junior Preparatory—

First Term	$10.00
Second and Third Terms, each	7.00
Incidental Expenses, per annum, (80 cents per month)	8.00

All other classes—

First Term	$12.00
Second and Third Terms, each	9.00
Matriculation Fee, on entering Collegiate Department	5.00
Incidental Expenses, per annum ($1.00 per month)	10.00
For Chemicals, to be paid by students in Chemistry, per term	2.00

Ministers' Children, Tuition, not including incidentals, half price.

The incidental fee is intended to meet the expenses of the College not included in the salaries of the Professors and Instructors.

College Statutes, Chapter II. Sec. 5: Every person, before he is admitted to the privileges of the college, shall obtain from the Treasurer a receipt by which it shall appear that he has complied with the ordinance of the Senate regarding fees and expenses, and if any officer admit to his recitation a student who has not paid up his College bills, such officer shall be held responsible for such bills.

Boarding in private families, including lodging and fuel, has, during the past year, ranged from $3.50 to $4.00 per week. Many students board in clubs at the cost of about $3.00 per week.

To those who club, pay the lowest rates, and the highest rates in private families, the cost per annum is as follows:

For board, fuel, room and light...	$114.40 to	$136.50 to	$156.00
For tuition and incidentals.....	40.00 to	40.00 to	40.00
For washing, estimated from.....	12.00 to	15.00 to	20.00
For text books.....	8.00 to	12.00 to	15.00
Total	$174.40	$203.50	$231.00

In the Junior Preparatory and in the First Year English, the cost is $8.00 per annum less for tuition and incidentals than in the College. The initiation fee for the gentlemen's Literary Societies is $5.00; for the ladies', $3.00; and when a student enters the Freshman class he pays a matriculation fee of $5.00. Books will average about $11.00 per annum, except during Junior and Senior years, when the cost becomes greater.

The cost of clothing and traveling and the private incidental expenses of a student are not included. They will depend largely upon the habits of the student. Clothing need cost but little, if anything, more in College than out.

HONORS.

The following persons received the Honors of the class of '94:

In the Classical Course—C. R. Stevenson, First Honor.

In the Scientific Course—May B. McClelland, First Honor.

Through the liberality of DR. WALLACE, the use of Two Tickets to the Warren County Library is given to the two students making the highest grade in the Junior Class—one in the Classical and the other in the Scientific Course. Rees Phelps and Abigail Robb have been the recipients of the above during the year.

The class of '85 has left with the Faculty a ticket to the Warren County Library as its memorial, the use of which during the Junior year is to be given to the student making the highest grade in the Sophomore Class, Classical. Jessie M. Clark has been the recipient of this ticket during the year.

Through the kindness and liberality of Dr. D. M. URE, of Allegheny, Pa., the use of a Warren County Library ticket is given the student ranking highest in the Sophomore Class, Scientific, to be used during Junior year. Ralph McCrackin has had the use of this ticket this year.

DEGREES CONFERRED.

At the Annual Commencement held June 14th, 1894, the following degrees were conferred:

A. B.

Burnside, Robert.
Campbell, William H.
Clark, Pearle Graham.
Clingan, Edwin M.
Findley, Samuel E.
Hamilton, Joseph C.
McAllister, Jennie R.
McCrackin, Robt. H.
McQuiston, M. Eva.
McKelvey, S. Willis.
Norcross, Sara E.
Stevenson, Curtis R.
Thompson, Robert W.
Waid, Lillian E.
Wishart, Charles F.
Woodburn, William W.

B. S.

Chamberlin, Harriett F.
Collins, Foster K.
Hardin, Nellie,
Harper, Jennie.
Hanna, Lyda M.
Jones, Elmer E.
Liggett Bessie.
McClelland, May B.
Park, Elizabeth Junia.
Regnier, Sara.
Stevenson, George J.
Spence, Anna I.

B. L.

Clendenin, James W.
Longcor, Williard T.

HONORARY DEGREES.

A. M.

Alice Winbigler, - - - - - Monmouth.

D. D.

Rev. John S. McKee, - - - - - Butler, Pa.

HONORARY DEGREES.

The following have received the Degrees attached to their names:

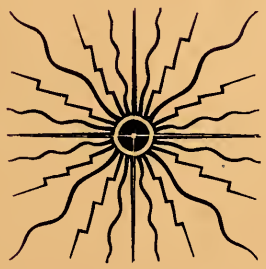
Rev. John Scott, D. D. *	Monmouth.	1861
Rev. Theophilus A. Wylie, D. D.	Bloomington, Ind.	1861
Rev. James Barnett, D. D. *.	Emporia, Kans.	1862
Rev. Alexander Jack, D. D	Scotland.	1862
Rev. Wm. Davidson, D. D. *	Hamilton, Ohio.	1864
Rev. George Scott, D. D.	Darlington, Pa.	1864
Rev. W. H. McMillan, A. M.	Allegheny, Pa.	1864
Rev. J. F. Graham, A. M. *	Denver, Col.	1864
O. N. Stoddard, LL. D. *	Wooster, Ohio.	1865
Rev. John McCurdy, D. D.	Chatham, New Brunswick.	1865
Rev. Gulian Lansing, D. D. *	Cairo, Egypt.	1865
Rev. W. T. Findley, D. D. *	Newark, N. J.	1866
Rev. John T. Boyd, D. D.	West Kilbride, Scotland.	1866
Rev. William Findley, D. D. *	Chesley, Can.	1866
Rev. William McLaren, D. D.	Ibera, Ohio.	1867
Rev. Samuel T. Wilson, D. D.*	Xenia, Ohio.	1867
Rev. J. M. Mc Donald, D. D. *	Morning Sun, Iowa.	1868
Rev. John F. Gowdy, A. M.	Bloomington.	1868
John M. McClellan, A. M.	Romeo, Mich.	1869
Rev. William Barre, D. D.	Examosca, Canada.	1870
Rev. Robert Dodds, D. D.	Alleppo, Syria.	1870
Rev. J. H. Pressly, D. D.*	Erie, Pa.	1871
Rev. J. J. A. Proudfoot, D. D.	London, Conn.	1871
Rev. S. S. Ralston, D. D.*	Le Claire, Iowa.	1871
Rev. Thomas Robinson, D. D.	Morpeth, England.	1871
Rev. James Scott, D. D.	Inverness, Scotland.	1871
Rev. J. A. McGaw, D. D.	Toledo, Ohio.	1871
Rev. C. B. Martin, D. D.	Evansville, Ind.	1871
Rev. W. Bruce, D. D. *	Xenia, Ohio.	1873
Rev. W. Grier, D. D.	Du West, S. C.	1873
Rev. David MacDill, D. D.	Xenia, Ohio.	1874
Rev. W. A. Mehard, D. D.	New Wilmington, Pa.	1874
Rev. W. J. Reid, D. D.	Pittsburg, Pa.	1874
Rev. R. A. McAyeal, D. D. *	Lawrence, Mass.	1875
Rev. J. G. Carson, D. D.	Xenia, Ohio.	1875

*Deceased.

Rev. J. Y. Scouller, D. D.	Fair Haven, Ohio.	1875
Rev. M. M. Gibson, D. D.	San Francisco, Cal.	1876
Rev. C. L. Thompson, D. D.	Chicago.	1876
Rev. Ed. J. Hamilton, D. D.	Hanover.	1877
Rev. J. R. Johnson, D. D.*	Washington, Pa.	1877
Hon. O. T. Reeves, LL. D.	Wesleyan Univer., Bloomington.	1878
Rev. W. H. McMillan, D. D.	Allegheny, Pa.	1879
Rev. J. S. McCulloch, D. D.	Knoxville, Tenn.	1879
Rev. H. H. Wells, D. D.	Cleveland, Ohio.	1879
Rev. C. T. McCaughan, D. D.	Winterset, Iowa.	1880
Rev. T. H. Hanna, D. D.	Monmouth.	1880
Rev. Thomas Balph, A. M.	St. Clairsville, Ohio	1880
Rev. J. F. Morton, D. D.	Cedarville, Ohio.	1881
Rev. Edward A. Thompson, D. D.*	Edinburg, Scotland.	1881
Prof. W. S. Haines, A. M.	Chicago.	1881
Rev. Nathan C. McDill, D. D.	Richmond, Ind.	1882
Rev. John H. Brown, D. D.	Lenox, Iowa.	1882
Prof. W. L. Steele, A. M.	Galesburg.	1883
Rev. J. M. Hutchinson, D. D.	Jeffersonville, Ind.	1883
Rev. Marian Morrison, D. D.	Mission Creek, Neb.	1883
Hon. J. L. Dryden, A. M.	San Diego, Cal.	1883
Dr. A. E. McClanahan, A. M,	Omaha, Neb.	1883
Dr. J. N. West, A. M.	Chicago.	1883
Prof. N. C. Campbell, A. M.	Ft. Madison, Iowa.	1883
Dr. H. VonSwearingten, A. M	Ft. Wayne, Ind.	1883
Rev. H. N. McKnight, D. D.	Cincinnati, Ohio.	1883
Rev. William Johnson, D. D.*	College Springs, Iowa.	1884
Prof. Albert McCalla, Ph. D.	California.	1884
Rev. J. A. Reynolds, D. D.	Putnam, N. Y.	1884
Rev. J, W. Witherspoon, D. D.	Allegheny, Pa.	1885
Rev. J. F. Hutchison, D. D.	Morning Sun, Ohio.	1886
Rev. J. C. McClintock, D. D.	Burlington, Iowa.	1886
Rev. John A. Wilson, D. D.	Wooster, Ohio.	1887
Mrs. Mary Cowden McMillan, A. M.	Allegheny. Pa.	1887
Rev. J. H. Walker, A. M.	Cincinnati, Ohio.	1887
Rev. Granville Cowden, A. M.	Denver, Colo.	1887
Rev. G. G. Mitchell, A. M.	Indianapolis, Ind.	1887
Rev. John Williamson, D. D.	Omaha, Neb.	1888
Pres. G. W. Willard, LL. D.	Tiffin, Ohio.	1888
Miss Martha Harger, A. M.	Minn.	1888
Rev. H. F. Wallace, D. D.	Portland, Ore.	1889
Rev. E. S. McKitrick, D. D.	Allegheny, Pa.	1889
Rev. C. D. Trumbull, D. D.	Morning Sun, Iowa.	1890
Rev. D. S. Littell, D. D.	Pittsburg, Pa.	1890
H. H. Robinson, A. M.	Geneva, Ill.	1890

*Deceased.

Rev. Wm. Harvey, D. D.	Cairo, Egypt.	1891
Rev. Wm. T. Moffet, D. D.	College Springs, Iowa.	1891
Dr. S. G. Stewart, A. M.	Topeka, Kans.	1892
Rev. J. T. McCrory, D. D.	Pittsburgh, Pa.	1892
Rev. Thos. McCague, D. D.	Omaha, Neb.	1893
Rev. J. D. Rankin, D. D.	Denver, Col.	1893
Rev. Joseph Calhoun, D. D.	Indianola, Iowa.	1893
Prof. Joseph Gordon, Ph. D.	Washington, D. C.	1893
Rev. John S. McKee, D. D.	Butler, Pa.	1894
Prof. Alice Winbigler, A. M.	Monmouth.	1894



CATALOGUE OF STUDENTS.

Collegiate Department.

☞ Those who have not been examined and passed in a sufficient number of subjects to entitle them at the close of the second term, according to the rules of the College. to regular standing in the class in which their names appear, are marked with an asterisk(*).

An "sc" following a name indicates that the student is taking the Scientific Course; "lt" indicates a Literary Course; "cl" the Classical Course.

SENIORS.

Brown, J. Arthur S, sc . . Morning Sun, Ohio
Campbell, Ida Mc lt . . . Monmouth
Campbell, John E. cl . . Carrollton, Ohio
Carson, William E. cl . . Wyman, Iowa
Dow, Laura, lt . . . Bellefontaine, Ohio
Downie, John, cl . . . Cleveland, Ohio
Duff, Gertrude May, lt . . Winterset, Iowa

Business Department.

With the Business College under direction of Prof. T.F. Heckert the Monmouth College has a working connection. Students not pursuing one of the regular courses, desiring to devote part of their time to such lines of work as this department affords, can have the opportunity without additional cost. In like manner students from the business school will be accorded similar privileges by the College. In either case it is for the principals of the departments to determine how much the student is able to carry. It is believed that this arrangement will prove advantageous to both schools.

MONMOUTH BUSINESS COLLEGE AND SCHOOL OF SHORTHAND AND TYPEWRITING.

We are firm believers in the old adage, "Do by doing;" and hence we use the Ellis system of book-keeping in our school, or actual business from the start, making our course thorough and practical. Our full business course includes Book-keeping, Actual Business, Banking, Arithmetic, Commercial Law, Grammar and Correspondence, Penmanship and Spelling.

SHORTHAND COURSE.

Shorthand, Typewriting Grammar and Correspondence, Penmanship and Spelling.

For particulars regarding the Business College, address

T. F. Heckert, Principal,
Patton Block, Monmouth, Ill.
